

# 18<sup>TH</sup> INTERNATIONAL CONFERENCE ON ALZHEIMER'S DRUG DISCOVERY

September 11-12, 2017 • Jersey City, NJ (*across the Hudson River from NYC*)

*Presented by the Alzheimer's Drug Discovery Foundation*

## GENERAL INFORMATION

The purpose for this annual Alzheimer's Drug Discovery Foundation (ADDF) conference is to accelerate the development of innovative treatments for Alzheimer's disease, related dementias and cognitive aging.

The two-day meeting is organized around four sub-topics: Neuroinflammation; Neuroprotection and Neural Regeneration; Epigenetics and Cognitive Enhancing; and Misfolded Proteins and Proteostasis.

Attendees will see the diverse cutting-edge approaches ADDF scientists are undertaking and have opportunities for networking and partnership discussions with academic, industry, and foundation thought leaders.

## OBJECTIVES

- Highlight scientific progress on drug discovery programs aimed at treating Alzheimer's disease and related dementias.
- Increase networking opportunities for scientists to share information and resources.
- Foster interdisciplinary and public-private partnerships and alliances.

## SCHOLARSHIPS

The Alzheimer's Drug Discovery Foundation will present **ten** 2017 ADDF Young Investigator Scholarships.

These prestigious scholarships recognize early achievements and seek to encourage the career development of the next generation of research scientists.

## TARGET AUDIENCE

The conference generally attracts 150 attendees from around the globe. Attendees include:

- Academic and industry scientists engaged in drug discovery research for Alzheimer's disease
- Business development and licensing professionals
- Alliance management professionals
- Venture capitalists and other investors
